MILK PRICE HIGHLIGHTS

Class I prices: January prices paid by dealers for milk used for fluid purposes (Class I) averaged $6.99 per cwt. for about 150 markets--up 1 cent from December 1969 and 29 cents above January 1969.

Regional averages ranged from 22 to 33 cents above a year earlier according to the Crop Reporting Board.

Store milk prices: Store prices to consumers in 25 cities during early January 1970 averaged nearly 57 cents per half gallon for whole milk, about 3 cents above a year earlier.

Home-delivered prices: Half gallon prices for home-delivered milk averaged slightly over 64 cents per half gallon. This was about $\frac{1}{2}$ cent above a month ago and 3 cents above a year earlier. Home-delivered prices represent list prices before quantity and other discounts.

SALES OF FLUID DAIRY PRODUCTS AND RECEIPTS OF MILK FROM PRODUCERS

Preliminary November sales: Preliminary data for November on average daily sales of fluid dairy products in 65 marketing areas (60 Federal and 5 State) averaged 3 percent less than a year earlier. November 1969 had one extra Sunday compared with November 1968-- this contributed to the decrease in average daily sales. Total sales for the January-November period of 1969 averaged about 0.5 percent above a year earlier.

October sales: Total sales of fluid products for October in regulated markets (60 Federal and 5 State) were 1 percent above a year earlier. October 1969 and October 1968 had the same number of sales days, excluding Sundays.

Whole milk sales in October were $1\frac{1}{2}$ percent below a year earlier.

Low-fat and skim milk sales in October were up nearly 15 percent from a year earlier.

Milk and cream mixture sales (mostly half and half) averaged 5 percent less than October 1968. Sweet and sour cream sales were down $2\frac{1}{2}$ percent from October 1968.

Milk receipts: November receipts of milk from producers at plants regulated for 62 marketing areas (58 Federal and 4 State) were up 2 percent from a year earlier. The number of producers delivering milk to plants for the same markets was down 3 percent from November 1968.

Milk production: U. S. milk production during December was estimated at 9.2 billion pounds--down 0.2 percent from a year earlier. December output provided 1.45 pounds of milk per person daily for all uses--compared with 1.42 pounds in November and 1.47 pounds a year earlier.

Preliminary monthly estimates of milk production for 1969 totaled 116.2 billion pounds, 0.9 percent less than the 1968 total. Production was below a year earlier in all months of 1969 except August, September and October. The largest decreases occurred during the first 5 months of the year.

1/ Regional and U.S. average based on prices for individual markets weighted by population. Prices for Federal-order markets include prevailing premiums above minimum Class I prices, as reported by principal producers' associations. Premiums may not apply to all Class I milk. Prices in this table do not represent returns to producers. Blend prices paid to producers, based on proportions used in fluid and manufactured products, are shown by markets in Table 6.
